Robin Toddler Bed
Conversion Kit

Oeuf, the New York-based design company known for smart, modern design, made in Europe, continues to raise the bar with their new Robin Collection. What makes the Robin so unique is the uncompromising quality that Oeuf is known for but at the company's lowest price point to date. Oeuf adapted to the market by designing the Robin and meeting the challenge to offer a more affordable option for its customers while ensuring that the collection adheres to its high product standards.

Essentially, Oeuf's designers went back to the drawing board, rethinking every component to minimize cost without sacrificing functionality, safety and style. The Robin is also Oeuf's most eco-friendly collection, made in Europe from 100% sustainable wood and painted in 100% natural, water-based paint.

Disclaimer:

The Nordic pine used in parts of the Robin collection contain natural features that vary from piece to piece. The knots may appear yellowish over time due to the natural reaction to sunlight and the use of 100% water-based finishes which allows for the natural characteristics of the wood to show through.
